

## IAAFA Member Benefit

### **IPATIENT COMMUNICATION SOFTWARE FOR FACIAL AESTHETICS *exclusive* 10% discount for IAAFA Members**

The MEDiVision Group in conjunction with Dr Bob Khanna is pleased to announce the launch of a brand new way of communicating facial aesthetic treatments to patients.

FaceFACTS uses high quality 3D animations to help you explain conditions, procedures and treatment options to your patients. The animations are supported by a range of documents including patient information leaflets, medical history, side effects, after care and consent forms. In addition, the program contains before and after photographs to which you can add your own. The program will:

- **Reduce your explanation time**
- **Increase your treatment acceptance**
- **Enhance the image of your practice**
- **Help you gain informed consent**

The **FACEFACTS software DVD retails at £999+VAT** so we are delighted to be able to offer delegates this exclusive discount. The FACEFacts software which Dr Bob Khanna has helped develop is an excellent consultation tool and one that has been successfully implemented in his own clinics.

***Also, for a very limited time period delegates who have already purchased CICPRO2008 dental software from MediVision can now purchase FACEFacts for a very special price of only £599+VAT. Plus you will still be entitled to a 10% discount on this price.***
